

Management's Discussion and Analysis Second Quarter Ended June 30, 2026

(Expressed in United States dollars, except per share amounts and where otherwise noted)

August 11, 2026

This Management's Discussion and Analysis ("MD&A") should be read in conjunction with the condensed consolidated interim financial statements for the period ended June 30, 2026 and related notes thereto which have been prepared in accordance with IFRS 34, Interim Financial Reporting of the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board, as well as the annual audited consolidated financial statements for the year ended December 31, 2025, which are in accordance with IFRS, and the related MD&A. References to "Entrée" and the "Company" are to Entrée Resources Ltd. and/or one or more of its wholly-owned subsidiaries. For further information on the Company, reference should be made to its continuous disclosure (including its most recently filed annual information form ("AIF")), which is available on SEDAR+ at www.sedarplus.ca. Information is also available on the Company's website at www.EntreResourcesLtd.com. Information on risks associated with investing in the Company's securities is contained in the Company's most recently filed AIF. Technical and scientific information under National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") concerning the Company's material property, including information about mineral resources and reserves, is contained in the Company's most recently filed AIF and in its technical report titled "Entrée/Oyu Tolgoi Joint Venture Project, Mongolia, NI 43-101 Technical Report" with an effective date of October 8, 2021 prepared by Wood Canada Limited ("Wood").

OUTLOOK AND STRATEGY

The Company's near-term objectives are as follows:

Transfer of Entrée/Oyu Tolgoi JV Licences

The current principal objective of the Company is to effect the transfer of the Shivee Tolgoi and Javkhant mining licences (the "Licences") from the Company's Mongolian subsidiary Entrée LLC to its joint venture partner Oyu Tolgoi LLC ("OTLLC") in accordance with applicable laws of Mongolia. Transfer of the Licences to OTLLC, as Manager and owner of an 80% (or 70% depending on the depth of mineralization) participating interest in the Entrée/Oyu Tolgoi joint venture property (the "Entrée/Oyu Tolgoi JV Property"), is necessary to enable Lift 1 Panel 1 lateral development work on the Shivee Tolgoi mining licence area to proceed.

State Ownership

The Company is also concurrently focused on the resolution of outstanding issues relating to the State of Mongolia's interest in the Oyu Tolgoi Strategic Deposit. The Minerals Law of Mongolia provides the State may, without compensation, be an up to 34% equity participant with any private legal entity in the exploitation of a mineral deposit of strategic importance (a "Strategic Deposit") where proven reserves were determined through funding sources other than the State budget. The Parliament of Mongolia may determine that the State receive royalty payments in lieu of an equity interest. The Licences are included in the boundaries of the Oyu Tolgoi Strategic Deposit.

The State already holds 34% of the economic benefit that OTLLC derives from its 80% (or 70% depending on the depth of mineralization) beneficial interest in the area of the Licences by virtue of Erdenes Oyu Tolgoi LLC's shareholding in OTLLC and the 2009 Oyu Tolgoi Investment Agreement (the "OTIA"). The Company has consistently maintained its willingness to fulfil any obligation under Mongolian law to provide the State 34% of the economic benefit that the Company derives from its 20% (or 30% depending on the depth of mineralization) beneficial interest in the area of the Licences.

On March 25, 2026, the Company delivered a non-binding proposal to the Minister of Industry and Mineral Resources of Mongolia as head of the working group (the "Government Working Group") established in order to negotiate the State's interest in the area of the Licences. The proposal contemplates, among other things, the transfer of the Licences to OTLLC as required under the OTIA and the 2008 Joint Venture Agreement between the Company and OTLLC (the "Entrée/Oyu Tolgoi JVA") and payment of a negotiated royalty on the gross sales value of the Company's concentrate as contemplated under the Minerals Law of Mongolia in lieu of the State being a 34% equity participant. The proposal is intended to form the basis for further discussions and negotiations with the Government of Mongolia. The Company

continues to monitor the situation, including with respect to anticipated timing for the resumption of discussions with the Government Working Group.

Potential Conversion of Entrée/Oyu Tolgoi JVA

The Company remains committed to working with OTLLC towards the potential conversion of the Entrée/Oyu Tolgoi JVA into a more effective agreement of equivalent economic value. The agreement would include a mechanism for the Company to fulfil any obligation under Mongolian law to provide the State 34% of the economic benefit that the Company derives from the area of the Licences. Conversion of the Entrée/Oyu Tolgoi JVA would be subject to Toronto Stock Exchange ("TSX") acceptance and the requirements of Multilateral Instrument 61-101 – *Protection of Minority Security Holders in Special Transactions* applicable to a related party transaction.

Q2 2026 HIGHLIGHTS

Entrée/OTLLC JV Licence Matters

- During the second quarter 2026, the Company continued to focus its efforts on the transfer of the Licences to OTLLC. Transfer of the Licences is necessary to enable Lift 1 Panel 1 underground development work on the Shivee Tolgoi mining licence area to proceed.
- In the second quarter 2026, the Entrée/Oyu Tolgoi joint venture ("Entrée/Oyu Tolgoi JV") updated the valuation calculations for the Licences and paid the tax imposed on income from the sale of rights to the Mongolian tax authority (the "MTA") in accordance with the Law on Corporate Income Tax.
- Following payment of the relevant corporate income taxes, on June 18, 2026, Entrée LLC resubmitted to the MTA a request for review of the valuation calculations for the Licences. A tax payment certificate must be obtained from the MTA as part of the documentation required to be submitted to the Mineral Resources and Petroleum Authority of Mongolia ("MRPAM") for registration of the transfer of the Licences.
- On June 26, 2026, the MTA notified Entrée LLC that it had not submitted its documents in accordance with the relevant methodology and procedures, so it is not possible to issue a tax payment certificate. Entrée LLC subsequently filed a formal complaint with the MTA.
- On July 29, 2026, Rio Tinto disclosed that in H1 2026 the Government of Mongolia agreed to commence work on the Entrée/Oyu Tolgoi JV licence transfer for Panel 1. See Rio Tinto's 2026 half year results press release dated July 29, 2026, titled "Step-change in performance delivering higher shareholder returns" available on its website at www.riotinto.com for further details.

Entrée/Oyu Tolgoi JV Property Update

- The Entrée/Oyu Tolgoi JV Management Committee approved a 2026 in-fill diamond drilling program at the Hugo North Extension ("HNE") deposit comprised of ~9,136 metres of drilling on the Shivee Tolgoi mining licence area in 16 underground holes. The purpose of the 2026 drilling is to support geology and geotechnical characterization both on and off the footprint, as well as fill in gaps for resource estimation.
- In June 2026, the Entrée/Oyu Tolgoi JV Management Committee approved the addition of 4 surface holes totaling ~5,039 metres at the HNE deposit targeting the North Bound Fault, which has been identified by OTLLC as a key control on subsidence propagation to the north. The North Bound Fault model is mainly derived from surface magnetics, with limited drill holes intersecting the fault.
- In H1 2026, OTLLC completed an updated resource model for Hugo North (including HNE) Lifts 1 and 2. OTLLC has advised the Company an updated Lift 1 underground mine plan and production schedule are expected to be completed in H2 2026. OTLLC is in the process of delivering information and data to enable Entrée to update its Technical Report on its interest in the Entrée/Oyu Tolgoi JV Property to incorporate the new resource model and production schedule. The Company is targeting Q1 2027 for completion of its Technical Report.

Oyu Tolgoi Underground Mine Update

The Oyu Tolgoi project in Mongolia includes the Oyu Tolgoi mining licence which is 100% owned and held by OTLLC and the Entrée/Oyu Tolgoi JV Property which is beneficially owned by the Entrée/Oyu Tolgoi JV participants. Rio

Tinto International Holdings Ltd. ("Rio Tinto") owns 66% of OTLLC and is the manager of operations at Oyu Tolgoi (see "Overview of Business" below). Oyu Tolgoi is set to become the world's fourth largest copper mine by 2030.

- On June 30, 2026, Rio Tinto disclosed Oyu Tolgoi Lift 1 underground production ramp-up remains on track to reach an average of around 500 thousand tonnes of copper per year from 2028 to 2036. As the largest-ever foreign direct investment made in Mongolia, Oyu Tolgoi employs around 17,000 people, 97.8% of which are Mongolian, and has returned \$6.1 billion in taxes, fees, and other payments since 2010. See Rio Tinto's press release dated June 30, 2026, titled "Rio Tinto and Government of Mongolia agree to adjust the Oyu Tolgoi shareholder loan interest rate" available on its website at www.riotinto.com for further details.
- On July 15, 2026, Rio Tinto disclosed planned maintenance at the concentrator impacted production in the second quarter 2026, which was partially offset by higher grades from the underground. The planned maintenance was successfully completed during the quarter. Year over year, Oyu Tolgoi delivered an increase in production driven by the ramp up of underground operations, and a higher combined grade from the open pit and underground. See Rio Tinto's press release dated July 15, 2026, titled "Rio Tinto releases second quarter 2026 production results" available on its website at www.riotinto.com for further details.
- On July 30, 2026, OTLLC disclosed Panel 0 on the Oyu Tolgoi mining licence reached its full production rate, marking an important milestone in the underground ramp-up progress, while development activities in Panel 2 North continued to advance. See OTLLC's press release dated July 30, 2026 titled "Q2 2026 Performance results" available on its website at www.ot.mn/en for further details.

Corporate

- For the three and six month periods ended June 30, 2026, the Company's operating loss was \$0.6 million and \$1.3 million, respectively, compared to \$0.6 million and \$1.3 million for the comparative periods in 2025.
- For the three and six month periods ended June 30, 2026, the operating cash outflow before changes in non-cash working capital items was \$0.5 million and \$1.1 million, respectively, compared to \$0.5 million and \$1.0 million in the comparative periods in 2025.
- As at June 30, 2026, the cash balance was \$3.1 million and the working capital balance was \$3.0 million.
- On June 18, 2026, Richard Williams was elected to the Company's board of directors (the "Board"). Mr. Williams has worked in the mining and mineral exploration sector for over 35 years, including as a mining executive for over 20 years.
- Subsequent to the second quarter 2026, Stephen Scott retired from his position as President, Chief Executive Officer and a director of the Company after more than 10 years of service. Chris Adams, a director of the Company since January 1, 2026, was concurrently appointed as President and Chief Executive Officer. Sarah Strunk was also appointed to the Board as an independent director. She has practiced business and finance law for more than 40 years and has represented numerous clients in the mining and natural resource industry.

SUMMARY OF RECENT EVENTS

Arbitration Award and Entrée/Oyu Tolgoi JV Licences

On December 19, 2024, a partial final award (the "Award") was made by the three-member international arbitration Tribunal appointed in connection with the Company's binding arbitration proceedings against OTLLC and Turquoise Hill Resources Ltd. (together, the "Respondents"). The Tribunal ruled in favor of the Company on all issues and dismissed the Respondents' counterclaims.

A principal objective of the Company is to effect the transfer of the Licences from the Company's Mongolian subsidiary Entrée LLC to OTLLC in accordance with applicable laws of Mongolia as the next step in the implementation of the Award. In February 2025, OTLLC and Entrée LLC duly executed and lodged License Transfer Agreements and supporting documentation with the MTA for the assessment of tax on the transfer of the Licences in accordance with applicable laws of Mongolia.

Corporate income tax at a rate of 10% of the value of the Licences (with certain deductions allowed) is assessed by the MTA in connection with transfer of the Licences. The methodology to calculate the value of the Licences for corporate income tax purposes is set out in Decree No. 302 passed by the Minister of Finance on December 31, 2019 (the "Methodology"). Taxes must be paid and a tax payment certificate provided by the MTA as part of the documentation

required to be submitted to the MRPAM for registration of the transfer of the Licences. As part of the Award, the Tribunal issued a final and binding declaration that all fees and taxes assessed on the transfer of the Licences pursuant to applicable laws of Mongolia will be for the account of the Entrée/Oyu Tolgoi JV, with OTLLC contributing the Company's 20% share as a Loan under Section 10.1 of the Entrée/Oyu Tolgoi JVA.

The Company and OTLLC actively engaged with the MTA and provided all materials necessary for the MTA to confirm the calculations of the values of the Licences in accordance with the Methodology, prior to the payment of taxes. No confirmation was received from the MTA within the timeframe prescribed by law. On August 1, 2025, Entrée LLC filed a claim with the Administrative Court of Mongolia seeking an order for the MTA to review and confirm the calculations of values of the Licences in accordance with applicable laws of Mongolia. At the Court hearing, the MTA argued there is no provision under applicable laws allowing taxpayers to wait for the MTA to confirm the calculations of the values of the Licences prior to the payment of taxes. On March 24, 2026, Entrée LLC requested a withdrawal of the claim and advised the Court the Entrée/Oyu Tolgoi JV would resubmit the request for the MTA to confirm the calculations of the values of the Licences after paying the relevant corporate income taxes. The Court approved this request. In June 2026, the Entrée/Oyu Tolgoi JV updated the valuation calculations for the Licences in accordance with the Methodology and paid the relevant corporate income taxes, and Entrée LLC resubmitted its request to the MTA accompanied by all required supporting documentation. On June 26, 2026, the MTA notified Entrée LLC that documents had not been submitted in accordance with the Methodology, so it is not possible for the MTA to issue a tax payment certificate. Entrée LLC subsequently filed a formal complaint with the MTA.

On July 29, 2026, Rio Tinto disclosed that in H1 2026 the Government of Mongolia agreed to commence work on the Entrée/Oyu Tolgoi JV licence transfer for Panel 1. While this process continues, OTLLC advanced Lift 1 mine development with Panels 0 and 2 North followed by Panel 2 South, all on the Oyu Tolgoi mining licence. While Rio Tinto noted Panel 1 is expected to be the final panel brought into production, mine plan options will continue to be assessed and optimized as appropriate. See Rio Tinto's 2026 half year results press release dated July 29, 2026, titled "Step-change in performance delivering higher shareholder returns" available on its website at www.riotinto.com for further details.

Ongoing delays in completion of the transfer of the Licences to OTLLC will result in delays, which may be significant, to Oyu Tolgoi Lift 1 Panel 1 lateral development work on the Shivee Tolgoi mining licence area. Such delays could have an adverse effect on development costs and schedule, the business, assets, future cash flow, and financial condition of the Company, and the Company's share price. See "Critical Accounting Estimates, Risks and Uncertainties" below.

State Ownership

On April 9, 2025, the Government of Mongolia adopted Resolution No. 170, which establishes the boundaries of certain Strategic Deposits, including the Oyu Tolgoi Strategic Deposit. The Licences are included in the boundaries of the Oyu Tolgoi Strategic Deposit. A Government Working Group was established by Order No. 73 of the Prime Minister of Mongolia dated August 22, 2025, to negotiate the State's interest in the area of the Licences.

The State already holds 34% of the economic benefit that OTLLC derives from its 80% (or 70% depending on the depth of mineralization) beneficial interest in the area of the Licences by virtue of Erdenes Oyu Tolgoi LLC's shareholding in OTLLC and the OTIA. The Company has consistently maintained its willingness to fulfil any obligation under Mongolian law to provide the State 34% of the economic benefit that the Company derives from its 20% (or 30% depending on the depth of mineralization) beneficial interest in the area of the Licences.

On December 26, 2025, the Parliament of Mongolia approved Resolution No. 120 directing the Government of Mongolia to implement certain measures with regard to the exploitation of the Oyu Tolgoi Strategic Deposit, to provide quarterly progress reports to the Economic Standing Committee of Parliament, and to present the results during the Autumn Session of Parliament in 2026. Among other things, Resolution No. 120 directs the Government of Mongolia to ensure adherence to the Constitution of Mongolia and other relevant legislation in the exploitation activities on the Licences, to develop proposals to determine the State's ownership to ensure that the people hold the majority of the benefits, and to establish conditions to avoid any future financial or investment obligations that could negatively impact Mongolia's share of benefits.

On March 25, 2026, the Company delivered a non-binding proposal to the Minister of Industry and Mineral Resources of Mongolia as head of the Government Working Group. The proposal contemplates, among other things, the transfer of the Licences to OTLLC as required under the OTIA and Entrée/Oyu Tolgoi JVA and payment of a negotiated royalty on the gross sales value of the Company's concentrate as contemplated under the Minerals Law of Mongolia in lieu of the State being a 34% equity participant. The proposal is intended to form the basis for further discussions and negotiations with the Government of Mongolia.

On June 30, 2026, Rio Tinto disclosed it has agreed with the Government of Mongolia to work together to resolve matters relating to the area of the Licences in a timely manner and bring forward distributions to shareholders of OTLLC (see Rio Tinto's press release dated June 30, 2026, titled "Rio Tinto and Government of Mongolia agree to adjust the Oyu Tolgoi shareholder loan interest rate" available on its website at www.riotinto.com for further details). Rio Tinto noted an agreement in principle on management fees was reached in May and announced it has reached agreement with the Government of Mongolia to adjust the shareholder loan interest rate for the Oyu Tolgoi project. According to the Government of Mongolia, the shareholder loan interest rate has been decreased to SOFR +4%.

Under both the OTIA and the Entrée/Oyu Tolgoi JVA, OTLLC has the exclusive right to hold the Licences and to construct and operate infrastructure, conduct mineral exploration, and conduct the operations of mining and processing in the area of the Licences. The Company will work closely with OTLLC, Rio Tinto and the Government Working Group to ensure State participation in the area of the Licences is resolved in a mutually beneficial manner in accordance with applicable contracts and laws.

If the Company is unable to resolve issues regarding the State's interest in a timely fashion or in a manner that is acceptable to the Company, it could have an adverse effect on the business, assets, future cash flow, and financial condition of the Company, and the Company's share price. See "Critical Accounting Estimates, Risks and Uncertainties" below.

OVERVIEW OF BUSINESS

Entrée is a mineral resource company with interests in development and exploration properties in Mongolia, Peru and Australia.

The Company's principal asset is its interest in the Entrée/Oyu Tolgoi JV Property – a carried 20% participating interest in two of the Oyu Tolgoi project deposits, and a carried 20% or 30% participating interest (depending on the depth of mineralization) in the surrounding large, underexplored, highly prospective land package located in the South Gobi region of Mongolia. Entrée's joint venture partner, OTLLC, holds the remaining participating interest.

The Oyu Tolgoi project includes the Oyu Tolgoi mining licence, which is 100% owned and held by OTLLC (66% Rio Tinto and 34% the State of Mongolia), and the Entrée/Oyu Tolgoi JV Property, a significant component of the overall project that is under joint venture between OTLLC and Entrée. The Entrée/Oyu Tolgoi JV Property (see Figure 1 below) comprises the Shivee Tolgoi and Javkhant mining licences, which surround the Oyu Tolgoi mining licence. The Licences are currently held by the Company's wholly owned subsidiary Entrée LLC as a bare trustee on behalf of the Entrée/Oyu Tolgoi JV participants. Under the Entrée/Oyu Tolgoi JVA, Entrée has a 20% participating interest with respect to mineralization extracted from deeper than 560 metres below surface and a 30% participating interest with respect to mineralization extracted from above 560 metres depth.

The Entrée/Oyu Tolgoi JV Property includes the Hugo North Extension (HNE) copper-gold deposit and the majority of the Heruga copper-gold-molybdenum deposit. The resources at Hugo North Extension include a Probable reserve, which is part of the first lift ("Lift 1") of the Oyu Tolgoi underground block cave mining operation. When the Lift 1 underground reaches peak production by ~2030, Oyu Tolgoi is expected to be the fourth largest copper mine in the world.

The Company's corporate headquarters are located in Vancouver, British Columbia, Canada. Operations in Mongolia are conducted out of a local office in Ulaanbaatar.

As at June 30, 2026 and the date of this MD&A, Rio Tinto beneficially owns 32,788,629 common shares, or 15.7% of the outstanding shares of the Company. As at June 30, 2026 and the date of this MD&A, Royal Gold Inc. ("Royal Gold"), through its wholly owned Canadian subsidiary International Royalty Corporation ("IRC"), beneficially owns 50,297,717 common shares, or 24.1% of the outstanding shares of the Company and holds non-transferable warrants to purchase 312,601 common shares of the Company at a price of C\$3.00 per share expiring January 23, 2027.

ENTRÉE/OYU TOLGOI JV PROPERTY– MONGOLIA

On October 21, 2021, the Company filed an amended Technical Report (the "2021 Technical Report") for its interest in the Entrée/Oyu Tolgoi JV Property. The 2021 Technical Report has an original effective date of May 17, 2021, and an amended effective date of October 8, 2021.

The 2021 Technical Report discusses a reserve case (the "2021 Reserve Case") based on mineral reserves attributable to the Entrée/Oyu Tolgoi JV Lift 1 of the HNE deposit.

The 2021 Technical Report also discusses a Preliminary Economic Assessment on a conceptual second lift ("Lift 2") of the HNE deposit (the "2021 PEA"). The 2021 PEA is based on Indicated and Inferred mineral resources from Lift 2, as the second potential phase of development and mining on the HNE deposit. Lift 2 is directly below Lift 1 and continues further to the north (see Figure 2 below). There is no overlap in the mineral reserves from the 2021 Reserve Case and the mineral resources from the 2021 PEA. Development and capital decisions will be required for the eventual development of Lift 2 once production commences at HNE Lift 1.

In addition, the Heruga deposit, which is not included in either the 2021 Reserve Case or the 2021 PEA, provides future potential and with further exploration and development could become a completely standalone underground operation.

Both the 2021 Reserve Case and the 2021 PEA are based on information supplied by OTLLC or reported within its 2020 Oyu Tolgoi Feasibility Study ("OTFS20") completed by OTLLC in July 2020.

The 2021 Technical Report has been filed on SEDAR+ and is available for review under the Company's profile on SEDAR+ (www.sedarplus.ca) or on www.EntreeResourcesLtd.com.

Summary and Location of Project

At the time the 2021 Technical Report was prepared, the Entrée/Oyu Tolgoi JV Property was divided into two contiguous areas. The Company was in joint venture with OTLLC over the eastern portion of the Shivee Tolgoi mining licence and all of the Javkhlant mining licence (the "Project Property"). The Company retained a 100% interest in the western portion of the Shivee Tolgoi mining licence, known as the "Shivee West Property".

On February 3, 2025, the Company assigned to OTLLC an 80% or 70% (depending on the depth of mineralization) beneficial interest in the Shivee West Property by amending the definitions of "Existing Licenses" and "Properties" in the Entrée/Oyu Tolgoi JVA to include the Shivee West Property for all purposes under the Entrée/Oyu Tolgoi JVA. The Company was engaged in active exploration of the Shivee West Property until 2012. While the Company identified several zones of gold and copper mineralization, no economic zones of precious or base metals mineralization were outlined.

The Entrée/Oyu Tolgoi JV Property (shown on Figure 1 below) completely surrounds OTLLC's Oyu Tolgoi mining licence and forms a significant portion of the overall Oyu Tolgoi project area. Figure 1 also shows the main mineral deposits that form the Oyu Tolgoi Trend of porphyry deposits.

The Entrée/Oyu Tolgoi JV Property is located within the Aimag (province) of Ömnögovi in the South Gobi region of Mongolia, about 570 kilometres ("km") south of the capital city of Ulaanbaatar and 80 km north of the border with China.

The Entrée/Oyu Tolgoi JV Property hosts:

- The Hugo North Extension (HNE) copper-gold porphyry deposit (Lift 1 and Lift 2):
 - Lift 1 is the upper portion of the HNE copper-gold porphyry deposit and forms the basis of the 2021 Reserve Case. It is the northern portion of the Lift 1 Panel 1 underground block cave. Lift 1 Panel 1 development work on the Entrée/Oyu Tolgoi JV Property has been paused until the Licences have been transferred from Entrée LLC to OTLLC as Manager on behalf of the Entrée/Oyu Tolgoi JV.
 - Lift 2 is directly below and extends north beyond Lift 1 and is the next potential phase of underground mining on the Entrée/Oyu Tolgoi JV Property, once Lift 1 mining is complete. Mineral resources from Lift 2 form the basis of the 2021 PEA mine plan.
- The Heruga copper-gold-molybdenum porphyry deposit is at the south end of the Oyu Tolgoi Trend of porphyry deposits. Approximately 93% of the Heruga deposit occurs on the Entrée/Oyu Tolgoi JV Property.

While Heruga is not included in the 2021 PEA, it provides opportunity for future exploration and potential development.

- A large prospective land package.

Entrée has a 20% or 30% (depending on the depth of mineralization) participating interest in the Entrée/Oyu Tolgoi JV with OTLLC holding the remaining 80% or 70% participating interest. OTLLC has a 100% interest in other Oyu Tolgoi project areas, including the Oyut open pit and the Hugo North and Hugo South deposits on the Oyu Tolgoi mining licence. The Oyut open pit as well as Panel 0 and Panel 2 North of the Hugo North Lift 1 underground mine are currently in production.

Figure 1 – Entrée/Oyu Tolgoi JV Property

Notes:

1. Outline of copper ± gold ± molybdenum porphyry mineralization is projected to surface.
2. Entrée has a 20% participating interest in the Hugo North Extension and Heruga deposits.

Figure 1 shows the location of a north-northeast oriented, west-looking longitudinal section (A-A') through the 12.4 km-long trend of porphyry deposits that comprise the Oyu Tolgoi Trend of porphyry deposits. The longitudinal section is shown on Figure 2 with the Entrée/Oyu Tolgoi JV Property to the right (north) and left (south) of the central portion, the Oyu Tolgoi mining licence, held 100% by OTLLC.

Figure 2 – Section Through the Oyu Tolgoi Trend of Porphyry Deposits

Idealized Longitudinal Section Looking West Entrée/Oyu Tolgoi JV Property, Mongolia

Note: The CuEq formula for Heruga is presented in Note 3 to Table 2 below.

The 2021 Technical Report forms the basis for the scientific and technical information in this MD&A regarding the Entrée/Oyu Tolgoi JV Property. Portions of the information are based on assumptions, qualifications and procedures which are not fully described herein. Reference should be made to the Company's AIF dated March 5, 2026 and to the full text of the 2021 Technical Report, which are available on the Company's website (www.EntreeResourcesLtd.com) or on SEDAR+ (www.sedarplus.ca).

Mineral Resources and Mineral Reserves – Entrée/Oyu Tolgoi JV Property

Entrée/Oyu Tolgoi JV Property mineral reserves are contained within the Hugo North Extension Lift 1 block cave mining plan prepared by OTLLC and used as the basis for OTFS20. The mineral reserve estimate is based on what is deemed minable when considering factors such as the footprint cut-off grade, the draw column shut-off grade, maximum height of draw, consideration of planned dilution and internal waste rock.

The following Entrée/Oyu Tolgoi JV Property Hugo North Extension Lift 1 mineral reserve estimate has an effective date of May 15, 2021.

Table 1 – Entrée/Oyu Tolgoi JV Property Hugo North Extension Lift 1 Mineral Reserve Estimate

Entrée/Oyu Tolgoi JV Property – Mineral Reserve								
Hugo North Extension Lift 1								
Classification	Tonnage (Mt)	NSR (\$/t)	Cu (%)	Au (g/t)	Ag (g/t)	Contained Metal		
						Cu (Mlb)	Au (Koz)	Ag (Koz)
Probable	40	97.52	1.5	0.53	3.63	1,340	676	4,613

Notes:

- For the underground block cave, all Indicated mineral resources within the cave outline were converted to Probable mineral reserves. No Proven mineral reserves have been estimated. The estimation includes low-grade Indicated mineral resources and Inferred mineral resource assigned zero grade that is treated as dilution.
- A column height shut-off net smelter return ("NSR") of \$17.84/t was used to define the footprint and column heights. The NSR calculation assumed metal prices of \$3.08/lb copper, \$1,292.00/oz gold, and \$19.00/oz silver. The NSR was calculated with assumptions for smelter refining and treatment charges, deductions and payment terms, concentrate transport, metallurgical recoveries, and royalties using OTLLC's Base Data Template 38.
- Mineral reserves are reported on a 100% basis. OTLLC has a participating interest of 80%, and Entrée has a participating interest of 20%. Notwithstanding the foregoing, in respect of products extracted from the Entrée/Oyu Tolgoi JV Property pursuant to mining carried out at depths from surface to 560 metres below surface, the participating interest of OTLLC is 70% and the participating interest of Entrée is 30%.
- Numbers have been rounded as required by reporting guidelines and may result in apparent summation differences.

The following Entrée/Oyu Tolgoi JV Property mineral resources estimates reported in the 2021 Technical Report for the Hugo North Extension and Heruga deposits have an effective date of March 31, 2021. Mineral resources for the Hugo North Extension deposit are reported inclusive of those mineral resources that were converted to mineral reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability.

Table 2 – Entrée/Oyu Tolgoi JV Property Mineral Resources Estimates

Entrée/Oyu Tolgoi JV Property – Mineral Resources										
Classification	Tonnage (Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Mo (ppm)	CuEq (%)	Contained Metal			
							Cu (Mlb)	Au (Koz)	Ag (Koz)	Mo (Mlb)
Hugo North Extension (>0.41% CuEq Cut-Off)										
Indicated	120	1.70	0.58	4.3	n/a	2.04	4,500	2,200	16,000	n/a
Inferred	167	1.02	0.36	2.8	n/a	1.23	3,800	1,900	15,000	n/a
Heruga (>0.41% CuEq Cut-Off)										
Inferred	1,400	0.41	0.40	1.5	120	0.68	13,000	18,000	66,000	370

Notes:

1. Metal prices used for copper equivalent ("CuEq") and cut-off grade calculation for both Hugo North Extension and Heruga are: \$3.08/lb copper, \$1,292.00/oz gold, \$19.00/oz silver and \$10.00/lb molybdenum (Heruga only). Metallurgical recoveries used for CuEq and cut-off grade calculation at Hugo North Extension are 93% for copper, 80% for gold and 81% for silver. Metallurgical recoveries used for CuEq and cut-off grade calculation at Heruga are 82% for copper, 73% for gold, 78% for silver and 60% for molybdenum.
2. Mineral resources at Hugo North Extension are constrained within a conceptual mining shape constructed at a nominal 0.50% CuEq grade and above a CuEq grade of 0.41% CuEq. The CuEq formula is $CuEq = Cu + ((Au * 35.7175) + (Ag * 0.5773)) / 67.9023$ taking into account differentials between metallurgical performance and price for copper, gold and silver.
3. The overall geometry and depth of the Heruga deposit make it amenable to underground mass mining methods. Mineral resources are stated above a CuEq grade. The CuEq formula is $CuEq = Cu + ((Au * 37.0952) + (Ag * 0.5810) + (Mo * 0.0161)) / 67.9023$ taking into account differentials between metallurgical performance and price for copper, gold, silver and molybdenum.
4. A CuEq break-even cut-off grade of 0.41% CuEq for Hugo North Extension mineralization and covers mining, processing and G&A operating cost and the cost of primary and secondary block cave mine development.
5. A CuEq break-even cut-off grade of 0.41% CuEq is used for the Heruga mineralization and covers mining, processing and G&A operating cost and the cost of primary and secondary block cave mine development.
6. Mineral resources are stated as in situ with no consideration for planned or unplanned external mining dilution.
7. Mineral resources are reported on a 100% basis. OTLLC has a participating interest of 80%, and Entrée has a participating interest of 20%. Notwithstanding the foregoing, in respect of products extracted from the Entrée/Oyu Tolgoi JV Property pursuant to mining carried out at depths from surface to 560 metres below surface, the participating interest of OTLLC is 70% and the participating interest of Entrée is 30%.
8. Numbers have been rounded as required by reporting guidelines and may result in apparent summation differences.

Oyu Tolgoi Project Underground Mine

Underground Mine Ramp-Up

On June 30, 2026, Rio Tinto disclosed Oyu Tolgoi Lift 1 underground production ramp-up remains on track to reach an average of around 500 thousand tonnes of copper per year from 2028 to 2036. As the largest-ever foreign direct investment made in Mongolia, Oyu Tolgoi employs around 17,000 people, 97.8% of which are Mongolian, and has returned \$6.1 billion in taxes, fees, and other payments since 2010. See Rio Tinto's press release dated June 30, 2026, titled "Rio Tinto and Government of Mongolia agree to adjust the Oyu Tolgoi shareholder loan interest rate" available on its website at www.riotinto.com for further details.

On July 15, 2026, Rio Tinto disclosed planned maintenance at the concentrator impacted production in the second quarter 2026, which was partially offset by higher grades from the underground. The planned maintenance was successfully completed during the quarter. Year over year, Oyu Tolgoi delivered an increase in production driven by the ramp up of underground operations, and a higher combined grade from the open pit and underground. See Rio Tinto's press release dated July 15, 2026, titled "Rio Tinto releases second quarter 2026 production results" available on its website at www.riotinto.com for further details.

On July 29, 2026, Rio Tinto disclosed that in H1 2026 the Government of Mongolia agreed to commence work on the Entrée/Oyu Tolgoi JV licence transfer for Panel 1. While this process continues, OTLLC advanced Lift 1 mine development with Panels 0 and 2 North followed by Panel 2 South, all on the Oyu Tolgoi mining licence. While Rio Tinto noted Panel 1 is expected to be the final panel brought into production, mine plan options will continue to be assessed and optimized as appropriate. See Rio Tinto's 2026 half year results press release dated July 29, 2026, titled "Step-change in performance delivering higher shareholder returns" available on its website at www.riotinto.com for further details.

On July 30, 2026, OTLLC disclosed Panel 0 on the Oyu Tolgoi mining licence reached its full production rate, marking an important milestone in the underground ramp-up progress. See OTLLC's press release dated July 30, 2026 titled "Q2 2026 Performance results" available on its website at www.ot.mn/en for further details.

The underground Lift 1 mine plan incorporates the development of three panels (Panels 0, 1, and 2 (North and South)), and to reach full sustainable production from the underground operations, all three panels need to be in production. The HNE deposit on the Entrée/Oyu Tolgoi JV Property is located at the northern portion of Panel 1.

Technical studies for Panels 1 and 2 mine design and schedule optimization were completed by OTLLC during the second quarter 2023. On July 11, 2023, Rio Tinto disclosed that:

- The technical studies have resulted in substantially de-risked, resilient mine designs that provide a pathway to ramp-up, flexibility to pursue value creating opportunities and react to future risks, and improved stability, constructability, and operability. The studies also provide a pathway to bring the panels into production faster and maximize the use of the ventilation system.
- Identified risks associated with the previous Panel 1 mine design have been resolved by increasing draw point and rim drive spacing, relocating the central material handling system and return raises outside of the active caving area, and optimally orienting the extraction drives and drill drives.
- Panel 1 production on the Oyu Tolgoi mining licence is planned to commence in ~2027.

The technical studies have been incorporated into the 2023 Oyu Tolgoi Feasibility Study ("OTFS23"), which is subject to acceptance by applicable regulatory bodies in Mongolia. Refer to Rio Tinto's Oyu Tolgoi Site Visit materials dated July 11, 2023 (and in particular pages 70-83 of "Financial Community Visit to Oyu Tolgoi Site - Slides") available on its website at www.riotinto.com for further details.

OTLLC previously advised the Company the Panel 1 undercut is expected to commence on the Entrée/Oyu Tolgoi JV Property in H2 2027 and draw bell firing is expected to follow in H2 2028. However, ongoing delays in completion of the transfer of the Licences to OTLLC will result in delays, which may be significant, to Oyu Tolgoi Lift 1 Panel 1 lateral development work on the Shivee Tolgoi mining licence area. Such delays could have an adverse effect on development costs and schedule, the business, assets, future cash flow, and financial condition of the Company, and the Company's share price. See "Critical Accounting Estimates, Risks and Uncertainties" below.

Following completion of the technical studies for Lift 1 Panels 1 and 2, OTLLC shifted its attention to the design of Hugo North (including HNE) Lift 2. Drilling programs to support a Lift 2 Pre-Feasibility Study are in progress. In H1 2026, OTLLC completed an updated resource model for Hugo North (including HNE) Lifts 1 and 2. OTLLC is in the process of delivering information and data to enable Entrée to update its 2021 Technical Report. The updated Technical Report will incorporate the new resource model as well as an updated Lift 1 underground mine plan and production schedule (expected to be completed by OTLLC in H2 2026). The Company is targeting Q1 2027 for completion of its updated Technical Report.

The 2021 Technical Report, the 2021 Reserve Case, and the 2021 PEA do not reflect the drilling programs or lateral development work carried out subsequent to the date of the 2021 Technical Report on the Hugo North Extension deposit, the technical studies incorporated into OTFS23, or the completion of underground Lift 1 Panel 0 production level development on the Oyu Tolgoi mining licence.

Entrée/Oyu Tolgoi JV Property Exploration and Development

HNE Lift 1 Panel 1 Underground Development

First Lift 1 Panel 1 underground development work on the Shivee Tolgoi mining licence area commenced in October 2024 in the southwest corner of the HNE deposit in rock classified as waste.

As at May 30, 2025, ~230 equivalent metres of lateral development primarily on the return air level had been completed by OTLLC. The work is part of the Panel 1 western ore handling truck chute design which, when completed, will include extraction level tiddle development, which connects the truck chute chamber on the haulage level, and the supporting ventilation loop with the return air level.

On June 6, 2025, the Company, OTLLC, and Rio Tinto separately announced a pause in Oyu Tolgoi Lift 1 Panel 1 underground development work on the Shivee Tolgoi mining licence area. Under the 2025 Oyu Tolgoi Mine Plan approved by MRPAM, work in the HNE deposit footprint had been conditionally scheduled to commence in June 2025. Development work in the ore zone cannot proceed until transfer of the Licences from Entrée LLC to OTLLC has been completed. See "Outlook and Strategy" above.

HNE Deposit Drilling

For 2026, the Entrée/Oyu Tolgoi JV Management Committee approved an in-fill diamond drill program at HNE comprising 16 underground holes totaling ~9,135 metres drilled on the Shivee Tolgoi mining licence. The drilling is intended to support geology and geotechnical characterization both on and off the footprint, as well as fill in gaps for resource estimation. As at June 22, 2026, ~3,065.8 metres of drilling had been completed in 7 underground holes (one of which was part of the approved underground drilling program for 2025) and ~938.1 metres had been completed in 2 surface holes that were part of the approved surface drilling program for 2025.

In June 2026, the Entrée/Oyu Tolgoi JV Management Committee approved the addition of 4 surface holes totaling ~5,039 metres at the HNE deposit targeting the North Bound Fault, which has been identified by OTLLC as a key control on subsidence propagation to the north. The North Bound Fault model is mainly derived from surface magnetics, with limited drill holes intersecting the fault.

All underground holes are collared from the Oyu Tolgoi mining licence and drilled onto the Entrée/Oyu Tolgoi JV Property to intersect the Hugo North Extension deposit or areas adjacent to the deposit where mine development infrastructure will be constructed. All surface holes are drilled entirely on the Shivee Tolgoi mining licence. The Company will continue to report analytical results from drilling programs at HNE as they have become available from OTLLC.

Regional Exploration

For 2026, the Entrée/Oyu Tolgoi JV Management Committee approved exploration programs that focus on the Ulaan Khud South target on the Shivee Tolgoi mining licence and the Southwest Heruga target on the Javkhlant mining licence along the known Oyu Tolgoi porphyry copper mineralization trend. For the Ulaan Khud South target, the program comprises 2 diamond drill holes totaling 1,830 metres and laboratory assaying of 1,056 samples inclusive of drill cores and QAQC samples. For the Southwest Heruga target, the program comprises 2 diamond drill holes totaling 1,510 metres and laboratory assaying of 871 samples inclusive of drill cores and QAQC samples.

Drilling is currently anticipated to commence in the third quarter 2026.

20% of expenditures on the Entrée/Oyu Tolgoi JV Property will be contributed by OTLLC on Entrée's behalf as a Loan in accordance with Article 10 of the Entrée/Oyu Tolgoi JVA.

Q2 2026 Financial Review

During Q2 2026, OTLLC incurred \$1.4 million in expenditures on the Entrée/Oyu Tolgoi JV Property related to HNE Lift 2 in-fill deposit drilling and study work, and regional exploration work on the area of the Licences. Entrée recognized 20% of these costs for a total of \$0.4 million, which was contributed by OTLLC on Entrée's behalf and allocated to the Loan payable to OTLLC. The \$0.4 million in expenditures related to HNE Lift 2 drilling and study work and regional exploration was recognized on the consolidated statement of comprehensive loss as loss from equity investee.

In June 2026, OTLLC incurred \$7 million in corporate income taxes imposed under the Methodology on income from the sale of rights in connection with the transfer of the Licences from Entrée LLC to OTLLC. Entrée recognized 20% of these costs for a total of \$1.4 million, which was contributed by OTLLC on Entrée's behalf and allocated to the Loan payable to OTLLC. Also, these costs have been capitalized to mineral property, right-of-use assets and equipment in the statement of financial position.

Interest in the amount of \$0.3 million was accrued to the Loan payable account in Q2 2026.

In addition to the costs contributed by OTLLC and allocated to the Loan payable to OTLLC, Entrée incurred \$0.1 million of project expenditures to manage and oversee its interest in the Entrée/Oyu Tolgoi JV during Q2 2026. These expenses were directly related to the Company's efforts to manage and resolve outstanding issues around the State's interest in the area of the Licences and the transfer of the Licences to OTLLC in order to enable Lift 1 Panel 1 lateral development work on the Shivee Tolgoi mining licence area to proceed.

SUMMARY OF CONSOLIDATED FINANCIAL OPERATING RESULTS

Operating Results

The Company's operating results for the three and six month periods ended June 30 were:

	Three months ended June 30		Six months ended June 30	
	2026	2025	2026	2025
Expenses				
Project expenditures	\$ 88	\$ 121	\$ 225	\$ 272
General and administrative	447	494	950	953
Share-based compensation	52	-	99	-
Depreciation	28	29	56	57
Operating loss	615	644	1,330	1,282
Foreign exchange loss (gain)	412	(757)	773	(766)
Interest income	(30)	(50)	(62)	(96)
Interest expense	163	173	355	345
Loss from equity investee	887	648	1,109	711
Finance costs	6	9	12	17
Deferred revenue finance costs	1,349	1,221	2,680	2,389
Loss for the period	3,402	1,888	6,197	3,882
Other comprehensive (income) loss				
Foreign currency translation	(1,671)	3,769	(3,086)	3,847
Total comprehensive loss	\$ 1,731	\$ 5,657	\$ 3,111	\$ 7,729
Total assets	\$ 5,882	\$ 7,622	\$ 5,882	\$ 7,622
Total non-current liabilities	\$ 90,156	\$ 82,427	\$ 90,156	\$ 82,427

Operating Loss:

During the three and six months ended June 30, 2026, the Company's operating loss was \$0.6 million and \$1.3 million, respectively, compared to \$0.6 million and \$1.3 million for the comparative periods in 2025.

Project expenditures in both 2026 and 2025 included legal, professional and advisory fees related to the Company's efforts to resolve outstanding issues around the State's interest in the area of the Licences and the transfer of the Licences to OTLLC. Both the 2026 and 2025 project costs included project administration.

For the three and six months ended June 30, 2026, general and administration were in line with the comparable periods in 2025.

Share-based compensation in 2026 was related to share options vesting in the period. Depreciation expenditures in 2026 was consistent with the comparable period in 2025.

Non-operating Items:

The foreign exchange loss in 2026 was the result of a weaker C\$ during the period and the negative effect on the US dollar denominated Loan payable to OTLLC balance (see "Loan Payable to OTLLC" below).

Interest expense was primarily related to the Loan payable to OTLLC pursuant to the Entrée/Oyu Tolgoi JVA and is subject to a variable interest rate.

The amount recognized as a loss from equity investee is related to exploration costs on the Entrée/Oyu Tolgoi JV Property.

Deferred revenue finance costs are related to recording the non-cash finance costs associated with the deferred revenue balance, specifically the IRC stream (see "Deferred Revenue – IRC" below).

The total assets as at June 30, 2026 were lower than at June 30, 2025 due to a lower cash balance.

The application of the Company's accounting policy for the capitalization of mineral property development costs required determination that key development milestones have been achieved. These milestones include obtaining sufficient financial resources, permits, and licences to develop the mineral property. The Company considered the start of development activities on Lift 1 Panel 1 of the Oyu Tolgoi underground block cave mining operation on the Shivee Tolgoi mining licence as having achieved the development milestones. Accordingly, the Company began capitalizing the development costs incurred on Lift 1 Panel 1 on the Entrée/Oyu Tolgoi JV Property in October 2024. As at June 30, 2026, the Company has capitalized \$2.0 million as Mineral property, right-of-use assets and equipment in relation to these development costs and also includes the payment of corporate income taxes imposed under the Methodology on income from the sale of rights in connection with the transfer of the Licences from Entrée LLC to OTLLC.

Total non-current liabilities have increased since June 30, 2025 due to recording the non-cash deferred revenue finance costs and additions to the Loan payable to OTLLC balance.

Quarterly Financial Data – 2 year historic trend

	Q2 26	Q1 26	Q4 25	Q3 25	Q2 25	Q1 25	Q4 24	Q3 24
Project expenditures	\$ 88	\$ 137	\$ 340	\$ 187	\$ 121	\$ 151	\$ 202	\$ 255
General and administrative	447	503	689	401	494	459	690	396
Share-based compensation	52	47	1,253	-	-	-	1,208	-
Depreciation	28	28	30	26	29	28	27	30
Operating loss	615	715	2,312	614	644	638	2,127	681
Foreign exchange loss (gain)	412	361	(513)	640	(757)	(9)	1,182	(172)
Interest expense, net	133	160	67	129	123	126	95	69
Loss from equity investee	887	222	1,904	616	648	63	2,782	152
Deferred revenue finance costs	1,349	1,331	1,280	1,254	1,221	1,168	1,181	1,192
Finance costs	6	6	7	7	9	8	9	12
Net loss	\$ 3,402	\$ 2,795	\$ 5,057	\$ 3,260	\$ 1,888	\$ 1,994	\$ 7,376	\$ 1,934
Basic/diluted loss per share	\$ (0.02)	\$ (0.01)	\$ (0.02)	\$ (0.02)	\$ (0.01)	\$ (0.01)	\$ (0.04)	\$ (0.01)
USD:CAD FX Rate ⁽¹⁾	1.42	1.39	1.37	1.39	1.36	1.44	1.44	1.35

1. USD:CAD foreign exchange rate was the quarter ended rate per the Bank of Canada.

Project expenditures in Q2 2026 were related to professional fees for arbitration proceedings and the Company's efforts to resolve outstanding issues around the State's interest in the area of the Licences and the transfer of the Licences to OTLLC.

General and administrative expenses in Q2 2026 were consistent compared to Q2 2025 and is mainly related to regulatory and compensation costs.

Share-based compensation expenditures in Q2 2026 was related share options vesting in the quarter.

Interest expense, net, consists of accrued interest on the Loan payable to OTLLC, net of interest income earned on cash balances.

The loss from equity investee was related to the Entrée/Oyu Tolgoi JV Property and fluctuations were due to exploration activities and foreign exchange changes.

LIQUIDITY AND CAPITAL RESOURCES

	Three months ended June 30		Six months ended June 30	
	2026	2025	2026	2025
Cash flows used in operating activities				
- Before changes in non-cash working capital items	\$ (500)	\$ (455)	\$ (1,098)	\$ (1,043)
- After changes in non-cash working capital items	(427)	(337)	(1,199)	(807)
Cash flows from / (used in) financing activities	111	(33)	79	3,899
Net cash (outflows) / inflows	(316)	(370)	(1,120)	3,092
Effect of exchange rate changes on cash	(62)	191	(123)	194
Cash balance	\$ 3,082	\$ 5,664	\$ 3,082	\$ 5,664

Cash outflows after changes in non-cash working capital items in Q2 2026 were higher than in Q2 2025 due to timing of invoice payments.

Cash flows from financing activities in Q2 2026 were due to funds received from option exercises.

The Company is a development stage company and has not generated positive cash flows from its operations. As a result, the Company has been dependent on equity and production-based financings for additional funding. Working capital on hand at June 30, 2026 was approximately \$3.0 million.

Management believes it has adequate financial resources to satisfy its obligations over the next 12-month period.

Loan Payable to Oyu Tolgoi LLC

Under the terms of the Entrée/Oyu Tolgoi JVA, the Company has elected to have OTLLC contribute funds to approved Entrée/Oyu Tolgoi JV programs and budgets on the Company's behalf, each such contribution to be treated as a non-recourse loan ("Loan"). Interest on each Loan advance shall accrue at an annual rate equal to OTLLC's actual cost of capital or the prime rate of the Royal Bank of Canada, plus two percent (2%) per annum, whichever is less, as at the date of the advance. The Loan will be repayable by the Company monthly from ninety percent (90%) of the Company's share of available cash flow from the Entrée/Oyu Tolgoi JV. In the absence of available cash flow, the Loan will not be repayable. The Loan is not expected to be repaid within one year.

Contractual Obligations

As at June 30, 2026, the Company had the following contractual obligations outstanding:

	Total	Less than 1 year	1 - 3 years	3-5 years	More than 5 years
Lease commitments	\$ 165	\$ 134	\$ 31	\$ -	\$ -

SHAREHOLDERS' DEFICIENCY

The Company's authorized share capital consists of unlimited common shares without par value.

At June 30, 2026 and the date of this MD&A, the Company had 209,115,102 shares issued and outstanding.

Share Purchase Warrants

At June 30, 2026 and the date of this MD&A, the following non-transferrable common share purchase warrants were outstanding:

Number of Warrants	Warrant exercise price C\$	Expiry date
1,288,850	3.00	January 23, 2027

Stock Option Plan

At June 30, 2026, the Company had 3,026,544 share options outstanding and 2,926,544 share options exercisable. At the date of this MD&A, the Company had 3,561,154 options outstanding and 3,041,054 share options exercisable.

Under the Company's Stock Option Plan, an option holder may elect to terminate an option, in whole or in part and, in lieu of receiving shares to which the terminated option relates (the "Designated Shares"), receive the number of shares, disregarding fractions, which, when multiplied by the weighted average trading price of the shares on the TSX during the five trading days immediately preceding the day of termination (the "Fair Value" per share) of the Designated Shares, has a total dollar value equal to the number of Designated Shares multiplied by the difference between the Fair Value and the exercise price per share of the Designated Shares.

The following is a summary of share options outstanding and exercisable as at the date of this MD&A:

Number of share options outstanding (000's)	Number of share options exercisable (000's)	Exercise price per share option (C\$)	Expiry date
699	699	0.77	Dec 2026
962	962	0.82 – 1.14	Apr - Nov 2027
582	582	1.28	Nov 2028
274	274	2.06	Nov 2029
310	310	2.22	Nov 2030
100	75	2.09	Dec 2030
100	50	2.40	June 2031
434	39	2.86	July 2031
100	50	2.42	Aug 2031
3,561	3,041		

For the three months ended June 30, 2026, the share-based compensation charges relating to 100,000 shares options granted to a director was \$0.05 million (2025 – nil).

For the six months ended June 30, 2026, the share-based compensation charges relating to 200,000 shares options granted to a director and an officer was \$0.1 million (2025 – nil).

Deferred share units (DSUs)

DSUs are granted to the Company's directors and executives as a part of compensation under the terms of the Company's Deferred Share Unit Plan (the "DSU Plan"). Typically, DSUs vest when certain conditions as stated in the DSU Plan are met, except in the event of an earlier change of control, in which case, the DSUs will vest fully upon such change of control.

At June 30, 2026, 3,294,527 DSUs were outstanding and fully vested. At the date of this MD&A, 3,364,457 DSUs were outstanding and fully vested. The following table is a summary at the date of this MD&A:

	Number of DSUs
Outstanding – December 31, 2025	3,637,735
Redeemed	(343,208)
Granted	69,930
Outstanding – date of this MD&A	3,364,457

DEFERRED REVENUE - IRC

On October 20, 2025, Royal Gold announced the closing of its previously announced acquisitions of Sandstorm Gold Ltd. ("Sandstorm") and Horizon Copper Corp. through its wholly owned Canadian subsidiary IRC. Subsequently, Royal Gold, IRC, Sandstorm and Horizon Copper Corp. undertook internal corporate reorganizations whereby, among other things, Sandstorm and Horizon Copper Corp. amalgamated with and into IRC. As a result, all property, rights, and obligations of Sandstorm (including the Amended Funding Agreement (as defined below)) and Horizon Copper Corp. (including common shares and warrants of the Company indirectly held by Horizon Copper Corp.) vested, by operation of law, in IRC.

The Company has an agreement (the "Amended Funding Agreement") to use future payments that it receives from its mineral property interests to purchase and deliver gold, silver and copper credits to IRC.

Under the terms of the Amended Funding Agreement, IRC provided the Company with a net deposit of C\$30.9 million (the "Deposit") in exchange for the future delivery of gold, silver and copper credits equivalent to:

- 28.1% of Entrée's share of gold and silver, and 2.1% of Entrée's share of copper, produced from the Shivee Tolgoi mining licence (excluding the western portion formerly known as the Shivee West Property); and
- 21.3% of Entrée's share of gold and silver, and 2.1% of Entrée's share of copper, produced from the Javkhant mining licence.

Upon the delivery of metal credits, IRC will make a cash payment to the Company equal to the lesser of the prevailing market price and \$220 per ounce of gold, \$5 per ounce of silver and \$0.50 per pound of copper (subject to inflation adjustments). After approximately 8.6 million ounces of gold, 40.3 million ounces of silver and 9.1 billion pounds of copper have been produced from the Project Property the cash payment will be increased to the lesser of the prevailing market price and \$500 per ounce of gold, \$10 per ounce of silver and \$1.10 per pound of copper (subject to inflation adjustments). To the extent that the prevailing market price is greater than the amount of the cash payment, the difference between the two will be credited against the Deposit.

The Deposit has been accounted for as deferred revenue on the statement of financial position and is subject to foreign currency fluctuations upon conversion to US dollars at each reporting period. The Deposit contains a significant financing component and, as such, the Company recognizes a financing charge at each reporting period and grosses up the deferred revenue balance to recognize the significant financing element that is part of this contract at a discount rate of 8%. For the three month period ended June 30, 2026, the deferred revenue finance costs totaled \$1.3 million (2025 - \$1.2 million).

Further information in relation to the Amended Funding Agreement is available in the Company's AIF dated March 5, 2026.

OTHER DISCLOSURES

Off-Balance Sheet Arrangements

Entrée has no off-balance sheet arrangements except for the contractual obligation noted above.

Related Party Transactions

The Company's related parties include key management personnel and directors. Direct remuneration paid to the Company's directors and key management personnel for the six month periods ended June 30 were as follows:

	2026	2025
Directors' fees	\$ 99	\$ 98
Salaries and benefits	\$ 416	\$ 396
Share-based compensation	\$ 99	\$ -

As of June 30, 2026, included in the accounts payable and accrued liabilities balance on the consolidated statement of financial position is \$0.06 million (December 31, 2025 - \$0.05 million) due to the Company's directors and key management personnel.

Upon a change of control of the Company, amounts totaling \$1.4 million (December 31, 2025 - \$1.4 million) may become payable to certain officers and management personnel of the Company.

Financial Instruments*a) Fair value classification of financial instruments*

The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices). Level 3 inputs are for the assets or liabilities that are not based on observable market data (unobservable inputs).

The Company's financial instruments consist of cash and cash equivalents, receivables, deposits, accounts payable and accrued liabilities, loan payable and lease liabilities.

The carrying values of cash and cash equivalents, receivables and accounts payable and accrued liabilities approximate their fair value due to their short terms to maturity.

The following table summarizes the classification and carrying values of the Company's financial instruments at June 30, 2026.

	FVTPL	Amortized cost (financial assets)	Amortized cost (financial liabilities)	Total
Financial assets				
Cash and cash equivalents	\$ -	\$ 3,082	\$ -	\$ 3,082
Receivables	-	19	-	19
Deposits	-	12	-	12
Total financial assets	\$ -	\$ 3,113	\$ -	\$ 3,113
Financial liabilities				
Accounts payable and accrued liabilities	\$ -	\$ -	\$ 180	\$ 180
Lease liabilities	-	-	214	214
Loan payable	-	-	23,273	23,273
Total financial liabilities	\$ -	\$ -	\$ 23,667	\$ 23,667

CRITICAL ACCOUNTING ESTIMATES, RISKS AND UNCERTAINTIES

The preparation of consolidated interim financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the amounts reported in the consolidated interim financial statements and accompanying notes. Actual results could differ materially from those estimates.

Measurement of the Company's assets and liabilities is subject to risks and uncertainties, including those related to reserve and resource estimates; title to mineral properties; future commodity prices; costs of future production; future costs of restoration provisions; political risk; changes in government legislation and regulations; future income tax amounts; the availability of financing; and various operational factors. The Company's estimates identified as being critical are substantially unchanged from those disclosed in the MD&A for the year ended December 31, 2025.

Entrée is a mineral exploration and development company and is exposed to a number of risks and uncertainties due to the nature of the industry in which it operates and the present state of development of its business and the foreign jurisdictions in which it carries on business; some of these risks and uncertainties have been discussed elsewhere in this MD&A. The discussion in this MD&A is not inclusive of all material risks and uncertainties. The material risks and uncertainties affecting Entrée, their potential impact, and the Company's principal risk-management strategies are substantially unchanged from those disclosed in the Company's AIF dated March 5, 2026 in respect of the year ended December 31, 2025, which is available on SEDAR+ at www.sedarplus.ca, OTC Markets at www.otcmarkets.com and on the Company's website at www.EntreeResourcesLtd.com.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for designing internal control over financial reporting, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. No change in the Company's internal control over financial reporting occurred during the period beginning on April 1, 2026 and ended on June 30, 2026 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

FORWARD LOOKING INFORMATION

This MD&A contains forward-looking information within the meaning of applicable Canadian securities laws.

Forward-looking information includes, but is not limited to, statements with respect to corporate strategies and plans; requirements for additional capital; uses of funds and projected expenditures; arbitration proceedings, including the potential benefits, timing and outcome of arbitration proceedings; the implementation of Resolution 120 of the Parliament of Mongolia; the Company's efforts to obtain a tax payment certificate from the MTA in accordance with applicable laws of Mongolia; the Company's efforts to transfer the Licences to OTLLC in accordance with applicable laws of Mongolia, the OTIA, and the Entrée/Oyu Tolgoi JVA; the expected sequence of mining within and across panel boundaries; the Company's plans to continue discussions with OTLLC and Rio Tinto regarding a potential conversion of the Entrée/Oyu Tolgoi JVA; the Company's efforts to continue discussions with the Government Working Group regarding the potential for the State to receive 34% of the economic benefit that the Company derives from its 20% beneficial interest in the area of the Licences pursuant to applicable laws of Mongolia; the potential timing of the transfer of the Shivee Tolgoi and Javkhant mining licences to OTLLC; the potential for Entrée to receive the benefits of the OTIA; the expectations set out in OTFS20 and the 2021 Technical Report on the Company's interest in the Entrée/Oyu Tolgoi JV Property; timing and status of ramp-up of the Oyu Tolgoi Lift 1 underground mine; the expected timing of development work on the Shivee Tolgoi mining licence and the potential for delay, which may be significant, if the Shivee Tolgoi mining licence cannot be transferred to OTLLC in a timely fashion; the nature of the ongoing relationship and interaction between the Company, OTLLC and Rio Tinto and the Government of Mongolia and Erdenes Oyu Tolgoi LLC with respect to the continued operation and development of the Oyu Tolgoi project, the transfer of the Licences, and State participation in the area of the Licences; the Lift 2 Pre-Feasibility Study, the updated resource model for Hugo North (including Hugo North Extension) Lifts 1 and 2, the updated Lift 1 mine plan and production schedule, and the Company's updated Technical Report, and the possible outcomes, content and timing thereof; timing and amount of production from Lift 1 of the Entrée/Oyu Tolgoi JV Property, potential production delays and the impact of any delays on the Company's cash flows, expected copper, gold and silver grades, liquidity, funding requirements and planning; future commodity prices; the estimation of mineral reserves and resources; projected mining and process recovery rates; estimates of capital and operating costs, mill and concentrator throughput, cash flows and mine life; capital, financing and project development risk; mining dilution; potential actions by the Government of Mongolia with respect to the Shivee Tolgoi and Javkhant mining licences and Entrée's interest in the

Entrée/Oyu Tolgoi JV Property; potential size of a mineralized zone; potential expansion of mineralization; potential discovery of new mineralized zones; potential metallurgical recoveries and grades; plans for future exploration and/or development programs and budgets; permitting time lines; anticipated business activities; proposed acquisitions and dispositions of assets; and future financial performance.

In certain cases, forward-looking information can be identified by words such as "plans", "expects" or "does not expect", "is expected", "budgeted", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "does not anticipate" or "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might", "will be taken", "occur" or "be achieved". While the Company has based this forward-looking information on its expectations about future events as at the date that such information was prepared, the information is not a guarantee of Entrée's future performance and is based on numerous assumptions regarding present and future business strategies; the correct interpretation of agreements, laws and regulations; the commencement and conclusion of arbitration proceedings, including the potential benefits, timing and outcome of arbitration proceedings; the Company's ability to engage in discussions and negotiations with the Government Working Group and the potential timing and outcome of any such discussions; the future ownership of the Shivee Tolgoi and Javkhant mining licences; that the Company will continue to have timely access to detailed technical, financial, and operational information about the Entrée/Oyu Tolgoi JV Property, the Oyu Tolgoi project, and government relations to enable the Company to properly assess, act on, and disclose material risks and opportunities as they arise; local and global economic conditions and the environment in which Entrée will operate in the future, including commodity prices, projected grades, projected dilution, anticipated capital and operating costs, including inflationary pressures thereon resulting in cost escalation, and anticipated future production and cash flows; the anticipated location of certain infrastructure and sequence of mining within and across panel boundaries; the continued ramp-up of the Oyu Tolgoi Lift 1 underground mine; the status of Entrée's relationship and interaction with the Government of Mongolia, Erdenes Oyu Tolgoi LLC, OTLLC, and Rio Tinto; and the Company's ability to operate sustainably, its community relations, and its social licence to operate.

With respect to the construction and continued development of the Oyu Tolgoi underground mine, important risks, uncertainties and factors which could cause actual results to differ materially from future results expressed or implied by such forward-looking information include, amongst others, an uncertain and unstable global economic and political environment, including China-U.S. tensions and the indirect impacts of the war in Ukraine and conflict in the Middle East, which could lead to critical supply shortages, falling commodity prices, trade actions (including increased tariffs, retaliations, and sanctions), and government efforts to exert more control over natural resources or to protect domestic economies by changing contractual, regulatory, or tax measures; the impacts of climate change and the transition to a low-carbon future; the nature of the ongoing relationship and interaction between OTLLC, Rio Tinto, Erdenes Oyu Tolgoi LLC and the Government of Mongolia with respect to the continued operation and development of Oyu Tolgoi; applicable taxes and royalty rates; the future ownership of the Shivee Tolgoi and Javkhant mining licences; mining operational and development risks, including geotechnical risks and ground conditions; the amount of any future funding gap to complete the Oyu Tolgoi project ramp-up and the availability and amount of potential sources of additional funding; inflationary pressures on prices for critical supplies for Oyu Tolgoi resulting in cost escalation; the ability of OTLLC or the Government of Mongolia to deliver a domestic power source for Oyu Tolgoi (or the availability of financing for OTLLC or the Government of Mongolia to construct such a source) within the required contractual timeframe; sources of interim power; OTLLC's ability to operate sustainably, its community relations, and its social license to operate in Mongolia; the impact of changes in, changes in interpretation to or changes in enforcement of, laws, regulations and government practises in Mongolia; delays, and the costs which would result from delays, in the ramp-up of the underground mine; the anticipated location of certain infrastructure and sequence of mining within and across panel boundaries; projected commodity prices and their market demand; and production estimates and the anticipated yearly production of copper, gold and silver at the Oyu Tolgoi underground mine.

The 2021 PEA is based on a conceptual mine plan that includes Inferred mineral resources. Numerous assumptions were made in the preparation of the 2021 PEA, including with respect to mineability, capital and operating costs, including inflationary pressures thereon resulting in cost escalation, production schedules, the timing of construction and expansion of mining and processing facilities, and recoveries, that may change materially following ramp-up of Hugo North Extension Lift 1 and additional development and capital decisions are required. Any changes to the assumptions underlying the 2021 PEA could cause actual results to be materially different from any future results, performance or achievements expressed or implied by forward-looking information relating to the 2021 PEA.

Other risks, uncertainties and factors which could cause actual results, performance or achievements of the Company to differ materially from future results, performance or achievements expressed or implied by forward-looking information include, amongst others, unanticipated costs, expenses or liabilities; discrepancies between actual and

estimated production, mineral reserves and resources and metallurgical recoveries; the impacts of geopolitics on trade and investment; trade tensions between the world's major economies; development plans for processing resources; matters relating to proposed exploration or expansion; regulatory restrictions (including environmental regulatory restrictions and liability); risks related to international operations, including legal and political risk in Mongolia; risks related to the potential impact of global or national health concerns; risks associated with changes in the attitudes of governments to foreign investment; risks associated with the conduct of joint ventures, including the ability to access detailed technical, financial and operational information; risks related to the Company's significant shareholders, and whether they will exercise their rights or act in a manner that is consistent with the best interests of the Company and its other shareholders; inability to upgrade Inferred mineral resources to Indicated or Measured mineral resources; inability to convert mineral resources to mineral reserves; conclusions of economic evaluations; fluctuations in commodity prices and demand; changing foreign exchange rates; the speculative nature of mineral exploration; the global economic climate; dilution; share price volatility; activities, actions or assessments by Rio Tinto or OTLLC and by government stakeholders or authorities including Erdenes Oyu Tolgoi LLC and the Government of Mongolia; the availability of funding on reasonable terms; the impact of changes in interpretation to or changes in enforcement of laws, regulations and government practices, including laws, regulations and government practices with respect to mining, foreign investment, strategic deposits, royalties and taxation; the terms and timing of obtaining necessary environmental and other government approvals, consents and permits; the availability and cost of necessary items such as water, skilled labour, transportation and appropriate smelting and refining arrangements; unanticipated reclamation expenses; changes to assumptions as to the availability of electrical power, and the power rates used in operating cost estimates and financial analyses; changes to assumptions as to salvage values; ability to maintain the social license to operate; accidents, labour disputes and other risks of the mining industry; global climate change; global conflicts; natural disasters; the impacts of civil unrest; breaches of the Company's policies, standards and procedures, laws or regulations; increasing societal and investor expectations, in particular with regard to environmental, social and governance considerations; the impacts of technological advancements; title disputes; limitations on insurance coverage; competition; loss of key employees; cyber security incidents; misjudgements in the course of preparing forward-looking information; and those factors discussed in the section entitled "Critical Accounting Estimates, Risks and Uncertainties" in this MD&A and in the section entitled "Risk Factors" in the AIF. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new information, future events, or otherwise. Accordingly, readers should not place undue reliance on forward-looking information.

TECHNICAL INFORMATION

Robert Cinits, P.Geo., has approved the technical disclosure in this MD&A. Mr. Cinits is a Qualified Person ("QP") as defined by NI 43-101.

Cautionary Note to United States Investors - Canadian Disclosure Standards in Mineral Resources and Mineral Reserves

All mineral reserve and mineral resource estimates included in this MD&A have been prepared in accordance with NI 43-101, which incorporates by reference the definitions of the terms ascribed by the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") in the *CIM Definition Standards for Mineral Resources and Mineral Reserves*, adopted by the CIM Council on May 10, 2014, as may be amended from time to time by the CIM.

NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral properties. NI 43-101 differs from the disclosure requirements of the United States Securities and Exchange Commission generally applicable to U.S. companies.

Accordingly, descriptions of mineral deposits contained in this MD&A may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
