These consolidated financial statements have been prepared on the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Management believes that the Company has sufficient working capital to maintain its operations for the next fiscal year.

2. BASIS OF PRESENTATION

The interim period financial statements have been prepared by the Company in conformity with generally accepted accounting principles in the United States of America. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, and in the opinion of management these financial statements contain all adjustments necessary (consisting of normally recurring adjustments) to present fairly the financial information contained therein. Certain information and footnote disclosure normally included in the financial statements prepared in conformity with generally accepted accounting principles in the United States of America have been condensed or omitted. These interim period statements should be read together with the most recent audited financial statements and the accompanying notes for the year ended December 31, 2011. 7. ACQUISITIONS (cont'd...)

The Company allocated the consideration to assets acquired and liabilities assumed as follows:

Cash	\$	837,263
Receivables and deposits		174,440
Investments		895,273
Mineral property interests		47,979,966

Deferred income tax liability		(13,991,460)
	\$	<u>35,768,281</u>

For the purposes of these consolidated financial statements, the purchase consideration has been allocated to the fair value of assets acquired and liabilities assumed, based on management's best estimates and taking into account all available information at the time of acquisition as well as applicable information at the time these consolidated financial statements were prepared.

8. MINERAL PROPERTY INTERESTS

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral property interests. The Company has investigated title to its mineral property interests and, to the best of its knowledge, title to the mineral property interests is in good standing.

Material Properties

The Company's two principal assets are its interest in the Lookout Hill copper-gold property in Mongolia, and the Ann Mason copper-molybdenum project in Nevada.

Lookout Hill, Mongolia

The Lookout Hill property in the South Gobi region of Mongolia is comprised of two mining licences, Shivee Tolgoi and Javhlant, granted by the Mineral Resources Authority of Mongolia in October 2009. Title to the two licences is held by the Company.

In October 2004, the Company entered into an arm's-length Equity Participation and Earn-In Agreement (the "Earn-In Agreement") with Ivanhoe Mines Ltd. ("Ivanhoe Mines"). Under the Earn-In Agreement, Ivanhoe Mines agreed to purchase equity securities of the Company, and was granted the right to earn an interest in what is now the eastern portion of the Shivee Tolgoi mining licence and all of the Javhlant mining licence (together the "Joint Venture Property"). Most of Ivanhoe Mines' rights and obligations under the Earn-In Agreement were subsequently assigned by Ivanhoe Mines to what was then its wholly-owned subsidiary, OTLLC. The Government of Mongolia subsequently acquired a 34% interest in OTLLC from Ivanhoe Mines.

On June 30, 2008, OTLLC gave notice that it had completed its earn-in obligations by expending a total of \$35 million on exploration of the Joint Venture Property. OTLLC earned an 80% interest in all minerals extracted below a sub-surface depth of 560 metres from the Joint Venture Property and a 70% interest in all minerals extracted from surface to a depth of 560 metres from the Joint Venture Property. In accordance

with the Earn-In Agreement, the Company and OTLLC formed a joint venture (the "Entrée-OTLLC Joint Venture") on terms annexed to the Earn-In Agreement.

The portion of the Shivee Tolgoi mining licence outside of the Joint Venture Property ("Shivee West") is 100% owned by the Company, but is subject to a first right of refusal by OTLLC.

The Shivee Tolgoi and Javhlant mining licences were each issued for a 30 year term and have rights of renewal for two further 20 year terms.

As of March 31, 2012, the Entrée-OTLLC Joint Venture had expended approximately \$21.9 million to advance the Joint Venture Property. Under the terms of the Entrée-OTLLC Joint Venture, OTLLC contributed on behalf of the Company its required participation amount charging interest at prime plus 2% (Note 9).

Ann Mason, Nevada, United States

The Ann Mason Project is defined by a series of both unpatented lode claims on public land administered by the Bureau of Land Management, and patented lode claims. The Company assembled this package of claims through a combination of staking and a series of transactions undertaken since August 2009, including the acquisition of PacMag. The project area includes the Ann Mason copper-molybdenum porphyry deposit, the Blue Hill oxide target, and several early-stage copper porphyry targets including the Blackjack, Roulette and Minnesota targets.

On August 26, 2010, the Company acquired 51% of Honey Badger Exploration Inc.'s ("Honey Badger") interest in unpatented lode claims formerly known as the Blackjack property after incurring expenditures of \$900,000 on the property, issuing 37,500 common shares and reimbursing Honey Badger for up to \$206,250 of expenditures previously incurred on the property. On July 27, 2011, the Company acquired Honey Badger's remaining 49% interest in the Blackjack property, by issuing 550,000 common shares and paying \$650,000 to Honey Badger. Certain of the claims are subject to an underlying mining lease and option to purchase agreement with two individuals. The underlying agreement provides for an option to purchase the claims for \$500,000, a 3% net smelter returns ("NSR") royalty (which may be brought down to a 1% NSR royalty for \$2 million) and annual advance minimum royalty payments of \$27,500 which commenced in June 2011 and will continue until the commencement of sustained commercial production. The advance payments will be credited against future net smelter returns royalty payments.

In September 2009, the Company entered into an agreement with Bronco Creek Exploration Inc. ("Bronco Creek"), a wholly-owned subsidiary of Eurasian Minerals Inc. (together, "Eurasian Minerals"), whereby the Company may acquire an 80% interest in unpatented lode claims formerly known as the Roulette property. In order to acquire its interest, the Company must: (a) incur expenditures of \$1,000,000, make cash payments of \$140,000 and issue 85,000 common shares of the Company within three years; (b) make aggregate advance royalty payments totalling \$375,000 between the fifth and tenth anniversaries of the agreement; and (c) deliver a bankable feasibility study before the tenth anniversary of the agreement. In accordance with the agreement, the Company has completed required exploration expenditures of \$600,000, issued 85,000 shares and made payments totalling \$140,000.

Stock options

The Company has adopted a stock option plan (the "Plan") to grant options to directors, officers, employees and consultants. Under the Plan, as amended in May 2011, the Company may grant options to acquire up to 10% of the issued and outstanding shares of the Company. Options granted can have a term of up to ten years and an exercise price typically not less than the Company's closing stock price on the last trading day before the date of grant. Vesting is determined at the discretion of the Board of Directors.

The Company uses the Black-Scholes option pricing model to determine the fair value of stock options granted. For employees, the compensation expense is amortized on a straight-line basis over the requisite service period which approximates the vesting period. Compensation expense for stock options granted to non-employees is recognized over the contract services period or, if none exists, from the date of grant until the options vest. Compensation associated with unvested options granted to non-employees is re-measured on each balance sheet date using the Black-Scholes option pricing model.

10. COMMON STOCK (cont'd...)**Stock options** (cont'd...)

The Company uses historical data to estimate option exercise, forfeiture and employee termination within the valuation model. The expected term of the options approximates the full term of the options. The risk-free interest rate is based on a treasury instrument whose term is consistent with the expected term of the stock options. The Company has not paid and does not anticipate paying dividends on its common stock; therefore, the expected dividend yield is assumed to be zero. Companies are required to utilize an estimated forfeiture rate when calculating the expense for the reporting period. Based on the best estimate, management applied the estimated forfeiture rate of Nil in determining the expense recorded in the accompanying Statements of Operations.
