NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2010

(Expressed in United States dollars)

1. BASIS OF PRESENTATION

The interim period financial statements have been prepared by Entrée Gold Inc. (the “Company” or “Entrée”) in conformity with generally accepted accounting principles in the United States of America. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, and in the opinion of management these financial statements contain all adjustments necessary (consisting of normally recurring adjustments) to present fairly the financial information contained therein. Certain information and footnote disclosure normally included in the financial statements prepared in conformity with generally accepted accounting principles in the United States of America have been condensed or omitted. These interim period statements should be read together with the most recent audited financial statements and the accompanying notes for the year ended December 31, 2009. The results of operations for the nine months ended September 30, 2010 are not necessarily indicative of the results to be expected for the year ending December 31, 2010.

2. NATURE OF OPERATIONS

The Company was incorporated under the laws of the Province of British Columbia on July 19, 1995 and continued under the laws of the Yukon Territory on January 22, 2003. On May 27, 2005, the Company changed the governing jurisdiction from the Yukon Territory to British Columbia by continuing into British Columbia under the British Columbia *Business Corporation Act*. The Company’s principal business activity is the exploration of mineral property interests. To date, the Company has not generated significant revenues from its operations and is considered to be in the exploration stage.

All amounts are expressed in United States dollars, except for certain amounts denoted in Canadian dollars (“C\$”), and Australian dollars (“A\$”).

3. SIGNIFICANT ACCOUNTING POLICIES

These consolidated financial statements follow the same significant accounting principles as those outlined in the notes to the audited consolidated financial statements for the year ended December 31, 2009.

The following recent accounting pronouncements are relevant to the Company’s financial reporting.

In April 2010, the FASB issued ASU 2010-13, *Compensation – Stock Compensation (Topic 718)*, amending ASC 718. ASU 2010-13 clarifies that a share-based payment award with an exercise price denominated in the currency of a market in which the entity’s equity securities trade should not be classified as a liability if it otherwise qualifies as equity. ASU 2010-13 also improves GAAP by improving consistency in financial reporting by eliminating diversity in practice. ASU 2010-13 is effective for interim and annual reporting periods beginning after December 15, 2010. The Company is currently evaluating the impact of ASU 2010-13, but does not expect its adoption to have a material impact on the Company’s financial reporting and disclosures.

In February 2010, the FASB issued ASU 2010-09, *Subsequent Events (Topic 855)*, amending ASC 855. ASU 2010-09 removes the requirement for an SEC filer to disclose a date relating to its subsequent events in both issued and revised financial statements. ASU 2010-09 also eliminates potential conflicts with the SEC’s literature. Most of ASU 2010-09 is effective upon issuance of the update. The Company adopted ASU 2010-09 in February 2010, and its adoption did not have a material impact on the Company’s financial reporting and disclosures.

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures (Topic 820), Improving Disclosures about Fair Value Measurements*, amending ASC 820. ASU 2010-06 requires entities to provide new disclosures and clarify existing disclosures relating to fair value measurements. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances

and settlements in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The Company adopted ASU 2010-06 during the March 2010 quarter, and its adoption did not have a material impact on the Company's financial position or results of operations.

4. ACQUISITIONS

The Company acquired all of the outstanding shares of PacMag Metals Limited (now PacMag Metals Pty Ltd) ("PacMag") on June 30, 2010, pursuant to a Scheme Implementation Deed dated November 28, 2009 and amended by a Deed of Variation dated April 12, 2010 (the "Scheme Deed"), with PacMag, by way of schemes of arrangement (the "Schemes") under the laws of Australia (the "Transaction"). All outstanding options to purchase PacMag shares were cancelled pursuant to the Schemes. Consideration for the PacMag shares acquired was common shares of Entree Gold ("Entree Shares"), with the number issued based on a share exchange ratio of 0.1018 Entree Shares for each PacMag share and C\$0.0415 cash for each PacMag share. Consideration for cancellation of PacMag options was Entree Shares, with the number issued calculated with reference to the share exchange ratio, the exercise price and time value for such PacMag options and whether the PacMag options were "in the money" or not. The Company issued an aggregate of 15,020,801 Entree Shares to former shareholders and option holders of PacMag.

The acquisition has been accounted for as an acquisition of the net assets of PacMag, rather than a business combination, as the net assets acquired did not represent a separate business transaction. For accounting purposes, Entree acquired control of PacMag on June 30, 2010 and these consolidated financial statements include the results of PacMag from June 30, 2010. As consideration, the Company issued 15,020,801 common shares valued at \$28,325,101, paid \$6,160,391 and incurred transaction costs of \$1,282,789 for a total consideration of \$35,768,281

A preliminary allocation of the purchase price, which is subject to final adjustments, is as follows:

Cash	\$	959,437
Receivables		52,266
Investments		895,273
Mineral property interests		49,280,499
Equipment		1,488
Accounts payables and accrued liabilities		(130,916)
Future income tax liability		(15,289,766)
	\$	<u>35,768,281</u>

For the purposes of these consolidated financial statements, the purchase consideration has been allocated on a preliminary basis to the fair value of assets acquired and liabilities assumed, based on management's best estimates and taking into account all available information at the time of acquisition as well as applicable information at the time these consolidated financial statements were prepared. Entree will continue to review information and perform further analysis with respect to these assets, prior to finalizing the allocation of the purchase price in 2010. Although the results of this review are presently unknown, it is anticipated that it may result in a change to the value attributable to tangible assets and future income tax liabilities.

5. INVESTMENTS*Asset Backed Commercial Paper*

The Company owns Asset Backed Notes (“AB Notes”) with a face value of C\$4,007,068 (December 31, 2009 – C\$4,013,365). The Company has designated the notes as “available for sale” and the notes are recorded at fair value.

During the fiscal quarter, the fair market value of the AB Notes was positively impacted by two factors: credit market conditions, and the passage of time.

Credit markets resumed their tightening trend in the third quarter of 2010, which was a significant influence on the increase in Fair Market Price of the AB Notes during Q3.

Secondly, the simple passage of time has a positive effect on fair market price. As with all debt instruments, if they do not default the value of these AB Notes will approach par as the maturity date approaches. The reduction in the time-to-maturity is a factor that increases the Fair Market Value of the AB Notes this period.

The impact of these positive factors was an increase in fair market value in the period. As a result of this analysis, the Company has estimated the fair market value of its AB Notes investment to be C\$2,623,998 as at September 30, 2010 (December 31, 2009 – C\$2,267,560). Accordingly, the Company has recorded an unrealized gain of \$341,936 in other comprehensive income (September 30, 2009 – \$475,541) for the nine months ended September 30, 2010.

The table below summarizes the Company’s valuation.

Restructuring categories	C\$ thousands			
	Face value	September 30/2010 C\$ Fair value estimate*	Dec 31/2009 C\$ Fair value estimate	Expected maturity date
MAV 2 Notes				
A1 (rated A)	1,960,231	1,537,392	1,388,866	12/20/2016

Total original investment	4,007,068	2,623,998	2,267,560	

* - the range of fair values estimated by the Company varied between C\$2.2 million and C\$2.7 million

- the total United States dollars fair value of the investment at September 30, 2010 is \$2,548,070 (Dec 31, 2009 - \$2,166,597).

We believe we have utilized an appropriate methodology to estimate fair value. However, there can be no assurance that management’s estimate of potential recovery as at September 30, 2010 is accurate. Subsequent adjustments, either materially higher or lower, may be required in future reporting periods.

Equity Method Investment

The Company has a 20% equity investment in a joint venture with Oyu Tolgoi LLC, a subsidiary of Ivanhoe Mines Ltd. (Note 7). At September 30, 2010, the Company’s investment in the joint venture was \$Nil (December 31, 2009 - \$94,154). The Company’s share of the loss of the joint venture is \$597,326 for the nine months ended September 30, 2010 (September 30, 2009 - \$65,548).

7. MINERAL PROPERTY INTERESTS

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral property interests. The Company has investigated title to its mineral property interests and, to the best of its knowledge, title to the mineral property interests are in good standing.

MONGOLIA**Lookout Hill**

The Company's Lookout Hill property in the South Gobi region of Mongolia is comprised of two mining licences (Shivee Tolgoi and Javhlant) granted by the Mineral Resources Authority of Mongolia and held through the Company's wholly-owned subsidiary Entrée LLC. The Shivee Tolgoi mining licence was issued for a 30 year term in October 2009 and has right of renewal for a further two 20 year terms. The Javhlant mining license was also issued for a 30 year term in October 2009 and has right of renewal for a further two 20 year terms.

The Company entered into an arm's-length Equity Participation and Earn-In Agreement (the "Earn-In Agreement") in October 2004 with Ivanhoe Mines Ltd. This agreement was subsequently assigned to Oyu Tolgoi LLC, which is owned as to 66% by Ivanhoe Mines Ltd. and as to 34% by the Government of Mongolia (Oyu Tolgoi LLC and Ivanhoe Mines Ltd. are collectively, "Ivanhoe Mines"). The Earn-In Agreement provided that Ivanhoe Mines would have the right, subject to certain conditions outlined in the Earn-in Agreement, to earn a participating interest in a mineral exploration and, if warranted, development and mining project on a portion of the Lookout Hill property (the "Joint Venture Property"). As of June 30, 2008, Ivanhoe Mines had expended a total of \$35 million on exploration on the Joint Venture Property and in accordance with the Earn-In Agreement, the Company and Ivanhoe Mines formed a joint venture (the "Entrée-Ivanhoe Joint Venture") on terms annexed to the Earn-In Agreement.

9. COMMON STOCK**Share issuances**

In February 2010, the Company issued 30,000 shares at a fair value of \$82,391 to Empirical pursuant to the January 2008 mineral property option agreement (Note 7).

In August 2010, the Company issued 80,000 shares at a fair value of \$185,863 to Empirical pursuant to the June 2007 mineral property option agreement (Note 7).

In June 2010, the Company issued 15,020,801 shares at a fair value of \$28,325,101 pursuant to the acquisition of PacMag (Note 4) and incurred \$147,228 of share issue costs.

During the nine months ended September 30, 2010, the Company issued 1,532,271 common shares for cash proceeds of \$1,794,520 on the exercise of stock options. The fair value recorded when the options were granted of \$1,359,386 has been transferred from additional paid-in capital to common stock on the exercise of the options. Included in the issued shares were 376,571 common shares issued pursuant to the cashless exercise of 1,535,300 options with an exercise price of C\$1.75 and 7,500 options with an exercise price of C\$2.60, with the remaining 1,166,229 options treated as cancelled.

Stock options

The Company has adopted a stock option plan (the "Plan") to grant options to directors, officers, employees and consultants. Under the Plan, as amended in June 2010, the Company may grant options to acquire up to 10% of the issued and outstanding shares of the Company. Options granted can have a term of up to ten years and an exercise price typically not less than the Company's closing stock price on the last trading day before the date of grant.

The Company uses the Black-Scholes option pricing model to determine the fair value of stock options granted. For employees, the compensation expense is amortized on a straight-line basis over the requisite service period which approximates the vesting period. Compensation expense for stock options granted to non-employees is recognized over the contract services period or, if none exists, from the date of grant until the options vest. Compensation associated with unvested options granted to non-employees is re-measured on each balance sheet date using the Black-Scholes option pricing model.

The Company uses historical data to estimate option exercise, forfeiture and employee termination within the valuation model. For non-employees, the expected term of the options approximates the full term of the options. The risk-free interest rate is based on a treasury instrument whose term is consistent with the expected term of the stock options. The Company has not paid and does not anticipate paying dividends on its common stock; therefore, the expected dividend yield is assumed to be zero. Companies are required to utilize an estimated forfeiture rate when calculating the expense for the reporting period. Based on the best estimate, management applied the estimated forfeiture rate of Nil in determining the expense recorded in the accompanying Statements of Operations.

Level 1 — Quoted prices that are available in active markets for identical assets or liabilities.

Level 2 — Quoted prices in active markets for similar assets that are observable.
